

The Volvo EC55 compact excavator, the perfect carrier for drilling/piling equipment.

CeDe Group keep a long relation with drilling/piling specialist Geomek.

Geomek is the Swedish distributor for Bauer and KLEMM drilling/piling equipment and have earned a very good reputation in the segment.

CeDe Group and Geomek together delivered an EC55 with a drilling/piling rig. The machine is extremely compact with low transport height and good manoeuvrability. The EC55 can be used for drilling or piling at smaller ground reinforcement sites. The EC55 is the perfect carrier for this application, with a good hydraulic capacity and a comfortable cab. The rig can be equipped with a hydraulic
